NATREZ CRAWFORD

SOFTWARE ENGINEER

EDUCATION

Software Engineering Immersive

Expected Graduation February 2020

EXPERIENCE

Engineering Fellow

-Studied on building full-stack web applications through a six month concentrated program that is striving to teach students on how to creatively think like software engineers in order to construct the next generation of web application.

Connect four

-The use of DOM manipulation to create a two player web application game that allows the user to play a classic game of Connect four. Skills: **JavaScript, HTML5, CSS3**

JokesterApp

-Created a full-stack Node app that uses CRUD functionalities and RESTful routing. Creating the app I also used an API call to fetch data and store them inside of a database. In the app, the user is able to sign-in/sign-up, able to click for random joke, save the random jokes that they liked, and also comment on the random joke. Skills: **NodeJS, PostgreSQL, API calling**

Petflix

-Developed a full-stack app with other developers with CRUD functionalities and RESTful routing. With the app you are able to post your dog with functions to see if the dog will get likes by other users. In the app, you are able to sign-in/sign-up, able to post your dog for each user to see with a caption, and able to like peoples post. Skills: **React.js, MongoDB, Material-UI, Redux**

ShopX

-ShopX is a full-stack app aimed to catch the eyes of of the marketing community. This application is an ecommerce website that allows the user to buy different items as well as see how much everything costs. Skills: **React.js, MongoDB, Redux.**

Operations Manager

- Daily communication with my team to review goals, metrics, and safety messages with the use of Microsoft Office tools.
- Provided feedback to develop package handlers in order to meet company expectations and the goals.

SKILLS

-Node.js -Javascript
-CSS3 -HTML5
-Management -MS Office
-Skilled Communicator
-Team-oriented personality
